

NARAHARI GUDAGUDI

Front-End Developer

 narahari.eng@gmail.com

 +91 8951784530

 Bengaluru, Karnataka

Professional Summary

Results-oriented Frontend Developer with around 6 years of experience in developing scalable, user-friendly web applications and dynamic UIs. Strong expertise in **React.js, Redux / Redux Toolkit, TypeScript, JavaScript (ES6+), HTML5, and CSS3**, with hands-on experience in building licensing platforms, telecom dashboards, and real-time data-visualization interfaces. Proven ability to translate complex requirements and Figma designs into pixel-perfect, responsive, and accessible frontends, while collaborating closely with clients and cross-functional teams to deliver high-quality features on time.

Technical Skills

- **Frontend Frameworks & Libraries:** React.js, Redux / Redux Toolkit
- **Languages:** JavaScript (ES6+), TypeScript
- **Markup & Styling:** HTML5, CSS3, Bootstrap, Tailwind, Styled-Components
- **UI & Design Integration:** Figma, responsive & accessible UI, CISCO Magnetic (proprietary CSS framework)
- **Tools & DevOps:** Git, GitHub, GitHub Copilot, CI/CD pipelines
- **APIs & State Management:** REST APIs (Axios, Fetch API), async/await, centralized Redux-Toolkit state
- **Visualization & Dashboards:** React Grid Layout, heat maps, Grafana-integrated dashboards
- **CMS / Static Sites:** WordPress, interactive landing pages and websites

Professional Experience

1.	IOPEX Technologies	[Front End Developer]	Bengaluru
	a. Client: CISCO – License Central (CLC)		Sep 2024 – Present
	• Contributed to an AI-powered licensing platform tracking the full license lifecycle, from order and activation to utilization, reallocation, and support. • Owned end-to-end Software Development Life Cycle (SDLC) activities including requirement analysis, development, testing, and ongoing maintenance. • Built an interactive dashboard using React Grid Layout and integrated CISCO’s proprietary CSS framework, Magnetic, to ensure consistent brand-aligned UI. • Collaborated directly with CISCO stakeholders to clarify requirements, prioritize features, and deliver solutions within agreed timelines and SLAs.		
	b. Client: T-Mobile – Network Heat Maps		
	• Developed real-time heat maps for Packet Core, Voice Core, and Messaging to visualize KPIs and packet-data trends against configurable thresholds. • Translated Figma designs into pixel-perfect React components, ensuring consistency with product-design guidelines and responsive behaviour across devices. • Implemented centralized state management using Redux Toolkit, reducing state-related defects by around 35% across production releases. • Built an SLO/SLI dashboard aggregating metrics from all three heat maps and integrated Grafana to provide real-time visibility for technical and business stakeholders.		

Client: Banter.io – Cloud Communication & Business Automation

Mar 2021 – Aug 2024

- Designed and developed **responsive and accessible user interfaces** using **React.js** and **TypeScript**, ensuring consistent performance across desktop and mobile devices.
 - Implemented **Bootstrap** along with **styled-components** to create reusable, scalable, and visually consistent UI components across the product suite.
 - Created **reusable templates** for multiple view types – **Grid View, Form View, and Card View** – accelerating feature development and improving UI uniformity.
 - Consumed **REST APIs** using **Axios** and the **Fetch API** with **async/await**, enabling seamless frontend–backend communication and dynamic data rendering.
-

Education

Bachelor of Engineering (Electronics & Communication Engineering), VTU Karnataka
